Excellent VR game! For those of you afraid of "just another bow and arrow game", have NO FEAR! It's actually quite the contrary. Lord of the Stack has made sure there are elements of exploration, varying creatures (smaller trolls, overbearing crazy-big giant enemies, etc), levels where you have to jump on different moving planks in burning hot lava (Mario-like), magic portals, and stunning visuals and excellent physics and game-play throughout.

Honestly - there is a lot to this game that I didn't even get to and it looks like more is being added as we speak. EXCELLENT BUY for only \$10 (really, IT'S A STEAL). Honestly, for all the hours that had to be put into this game, it really could be priced higher because it's excellent quality and has great depth. I'm likely going to buy another copy for one of my friends (after Christmas) just because I want to support the developers bc I know it's a rough gig out there and I really appreciate you guys making these quality VR games.

Side note - everytime I lost to a wave of goblins and got transported to the throne room to fight inside the castle - holy smokes those goblins made me scream because it is so freaking intense when you get over-taken!! I LOVE IT!! Do not buy this game. It is unstable. It loads on my computer, asks me to pick a landing site, and then to pick a crew. As soon as you pick a crew it shows you a rotating picture of Mars and freezes up. I tried rebooting and running the game again and it happened again. After three tries I gave up. Never even got to play the game. Waste of \$5.00!. **Although the digital arbook for *Immortal Redneck* is high enough quality - I consider this purchase to be a donation of sorts in hopes of future (paid) DLC. I'm totally hooked on this game. It really surprised me. Brings back feelings of Neon Chrome and all the fun I had grinding through.**

While Immortal Redneck doesn't break a whole lot of ground - it is an absolutely outstanding FPS roguelite title with tons of content and replayability.. If you wanna play a game where a lesbian inexplicably kidnaps a child, this is the game for you! The very badly written game. Don't play this game. Also, Nashville doesn't have a dry heat.. Hot damn that was a nice 20 hours! Looking forward to the updates planned for the future. A couple of quality of life changes and the game would be practically flawless.

10\10 would HopFrog again.

. A wholly unique game that i have the hardest time figuring the genre of, but alot of fun nonetheless. Really shines with a partner, but its a hectic ride either way!. You literally just get the tiles shown in the picture. Unless that just happens to be EXACTLY what you're looking for, I wouldn't recommend it.. Fun game based off of a nice gimmick. This wont keep you playing for a while, but its a nice concept and could have been better with some story elements similar to Shenmue for dreamcast ∨ Xbox.. Just don't.. Less than two hours of gameplay and no replay value...not worth it at any price!

It is a deck building game like slay the spire.

I am not sure if i like this game. I like card games but at this point there is too many that doesn't feel right. I know the devs are reading the feedback so i put the things i think should be changed. Hopefully this is getting better but for now i cannot recommend this game even if i want to like it.

- can't skip chapter dialog
- "Shield of Pride" too expensive. maybe 3 Mana
- discarding cards back to battledeck seems pointless
- update cost with reosurces are too expensive V or too few resources
- the events feel too punishing (loosing cards is not fun at all)
- renewing cards with 20 health is too expensive on health (maybe reduce the cost to 15 health instead)
- most of the cards are feeling pointless
- what is the point of having an end boss in chapter 4 when your progress literly doesn't matter (cards V upgrades V health).

Awesome couch-party-game! A good variety of maps and a lot of options for adapting the game after your preferences.. Weirdly engrossing. It's got a very relaxing vibe that I can see remembering fondly down the line.. Do NOT get this expansion. While it add a hell lot of gameplay interesting gameplay mechanic, such as raising kid and the way of life (i love way of life tbh) the abilities to edit or create your own strategy as well as edit specialties , the option to abdicate and allowing the ai to take over (i assume since i can't really get the game working for me), the ability to have private elite troop to take into battle and bypassing the 100k cap , along to what i assume is the option to transfer troop to another city. It also will guarantees to break a metric \u2665\u2665\u2665\u2665 load of thing, well graphic side that is. One problem that keep popping up for me is how utterly slow the game run at, and b4 you comment "oh its probably cuz you dont have enough ram\cpu\gpu\blahblah, i have an i7 7800 with a 1050 ti and 32gp of ram, more than enough to run this game on max setting. Another common problem i ran into often is that i keep constantly crashing the moment i loaded a save and with no other way that i know of to fix that , i keep having to start a new game all over. The ui system doesn't really improve much from the base game, if anything its even worse, since click and exiting out of menu take so much longer, and if you play a single session long enough, you start to notice when you zoom out that there are white patches to where the mountain\valley\city should be. Hell one game i somehow manage to make it so that the back ground detail wont load even after i go back to an earlier save forcing me to play with white patches of background everywhere.

To sumerize ? While the mechanic they added into this expansion pack truly enhance the game to a whole new other level literally in some case, i feel as if some of them should've been present in the base game already. But the amount of graphical error i have encounter, really turn me off. Sadly i can't get a refund for this expansion pack (sorry i mean 'puk') cuz i have spend way to much time trying to get it to work :s. tl;dr dont get it if you can't stand game breaking graphic bugs, if you dont care about it cool, more power to you. Bad and buggy. Save your money
